dipoles of simple, real molecules Molecule Polarity - Guided Inquiry Activity - PhET ... Molecule Polarity: Description The activity was used in undergraduate recitations on polarity, and provides a guided inquiry of the simulation. Students explore and answer questions on the first two tabs, and then predict the bond and molecular dipoles for real molecules in the third tab. Subject Chemistry: Level Molecule Polarity - PhET Contribution Subscribe to Unlock. Molecule Polarity Lab Introduction: In this atomic-level simulation, you will investigate how atoms' electronegativity value affects the bonds they produce. When two atoms bond, a pair of electrons is shared between atoms. Electronegativity is a measure of a single atom's ability to attract the electrons shared in that bond. In this lab you will work to answer a number of questions.
